

Scanning

Overview

Four workstations that are equipped with scanners are available in the [South Information Commons](#) [1]. Accompanying software includes image editing (including Adobe Photoshop), web page markup, and optical character recognition (OCR), a function that allows you to turn a printed document into editable text.

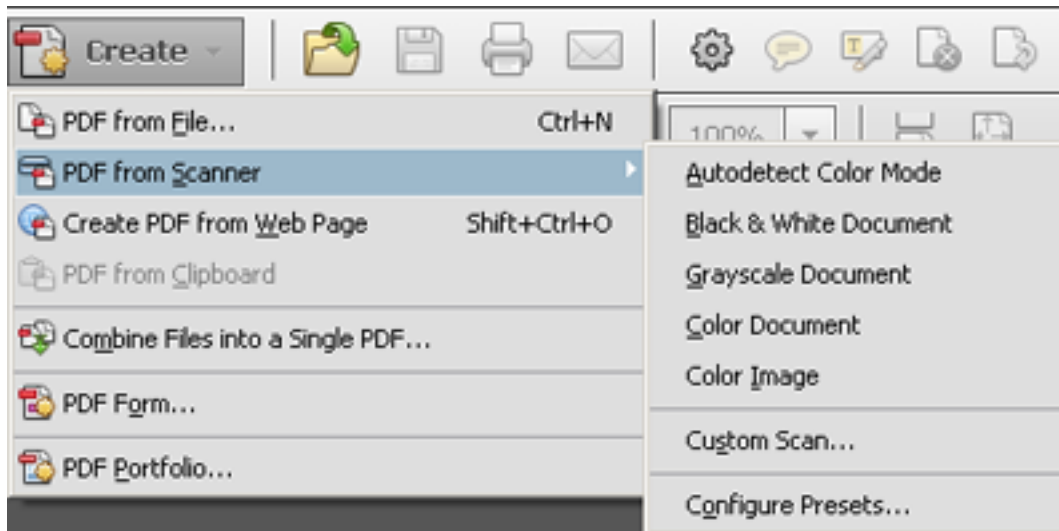

Copyright information:

Any images as well as text may be subject to copyright, and should not be scanned without prior permission of the copyright holder(s). **Unauthorized copying of any such material is strictly forbidden.**

The photocopiers also have the ability to scan. There are three photocopiers at the library, on the lower, main and second floors, but only the photocopiers on the main and second floor can scan.

Scanning Text (PDF)

1. Place your document face-down at the bottom-right corner of the scanner.
2. In the **Start** menu, select **Publishing Tools » Adobe Design Premium CS5.5 » Adobe Acrobat X Pro**.

3. Click on the type of format that matches your document. The scanner will now scan the first page of your document.
4. If you have no other pages to scan, select **Scan is Complete** and then click **OK**. Proceed to step 8.

Scanning

Acrobat Scan

Please indicate if this scan is complete or if you need to scan more pages to complete this document.

- Scan is Complete
- Scan more pages (sheet 2)
- Scan reverse sides (reverse of sheet 1)

OK

- If you have more pages to scan, select **Scan more pages** or **Scan reverse sides** (for two-sided documents). Click **OK** when the entire document has been scanned.
- Click on the **save** icon near the left-hand corner of the window and choose the location where you want the file to be saved (e.g. My Documents), then enter a file name.

- Click **Save**. Remember to remove your document from the scanner bed.

Scanning Photos

- Under the **Start** menu, select **Publishing Tools » EPSON Scan**.
- In the right-hand corner, click on the **Mode** drop-down menu and select **Home Mode**.

- Select the **Document Type** and **Image Type** to match that of your photo.

Scanning

Published on E.J. Pratt Library (<http://library.vicu.utoronto.ca>)

- Under **Destination**, specify the quality of the image: **Screen/Web** for small file size or **Printer** for high quality prints. **Other** allows for custom resolution.

- Click **Preview**.

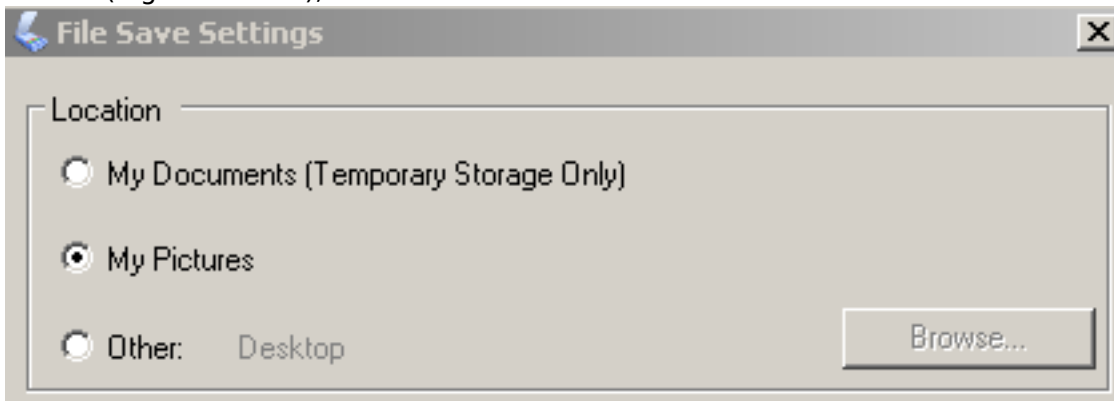

- Optionally, click on the **Normal** tab in the window that opens, and select the area of your document to scan.

- Click **Scan**.

- In the **File Save Settings**, choose a location to save the file. If your desired location is not on the list (e.g. USB drive), select **Other** and then click the **Browse...** button.

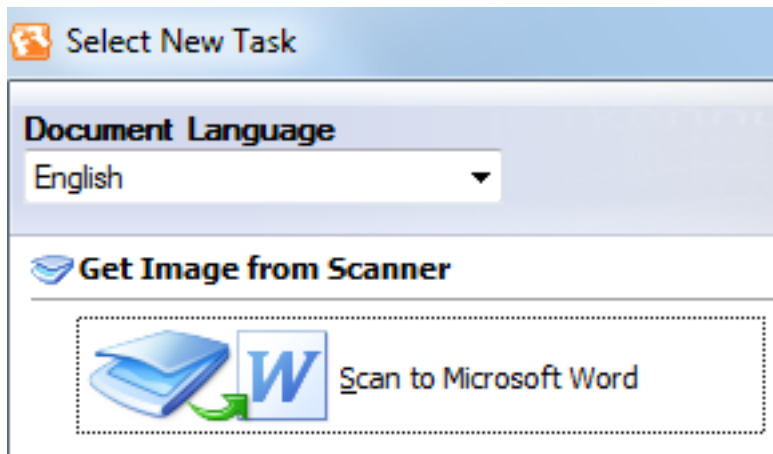

- Click **OK**. Remember to remove your document from the scanner bed!

Scanning Text (OCR)

- In the **Start** menu, select **Publishing Tools**, and then click on **ABBY FineReader 9.0 Sprint**.
- In the **Select New Task** dialogue window, click on **Scan to Microsoft Word**.

Scanning

Published on E.J. Pratt Library (<http://library.vicu.utoronto.ca>)

3. In the next window that opens, click **Preview**.

4. Click **Scan**.

5. Repeat steps 3 and 4 for for each document you are scanning.

6. After scanning is finished, click **Close**.

7. The file will now be examined for recognizable text and images.

8. Once the scanned file has been converted to an editable OCR document, it will automatically open as **Document1** in Microsoft Word.

9. Go to **File** and click **Save**.

10. Remember to remove your document from the scanner bed!

Scanning on the Photocopiers

Scanning

Published on E.J. Pratt Library (<http://library.vicu.utoronto.ca>)

The copier on the lower floor supports black and white copying but not scanning and accepts both TCard and cash for payment. The copiers on the main and second floors allow for black and white as well as colour copying and support scanning, but only accept TCard.

The photocopiers scan multiple formats including Slim PDF which is suitable for scanning multiple pages into a single file.

Please consult our [Guide to Scanning on the Photocopiers](#) [2] (PDF) for basic set of instructions. Printed copies of the brochure are available at the [IT Support Desk](#) [3].

Scanning is free but users must supply their own USB keys to save their files.

Technical Support

If you require technical support at any point of the process, please visit us at the [IT Support Desk](#) [4] in the South Information Commons on the main floor.
