#### **Collection Statement**

I was seven when my mother gave me my first *Nancy Drew* book for the holidays. She had read the series when she was my age, and felt it was time to pass the love of mysteries onto me. The rest of my childhood was defined by that gift. On the inside cover of the first few books I acquired was an itemized list of every single book in the *Nancy Drew* series, and I became determined to collect all of them. It took six years to achieve that, and now I get to brag that I’m the proud owner of a sixty-four-book collection.

Most of the books in my collection are second-hand, bought from library sales or used bookshops or Kijiji. That means that many of them are not in pristine condition, but instead have dog-eared pages, scribbles on the title page, or “sale” stickers on the cover. But while these imperfections in my books might disrupt the synchronicity of the collection, I find it beautiful—so many people have touched those books and engaged with those stories, so through my collection, I find myself as a cumulative point of childhood literary passion.

I also tried to get only the classic yellow hardcovers, since they were what everyone pictured when they thought “Nancy Drew.” But buying second-hand means you can’t be picky, and I ended up owning some copies of the older, rough-textured covers. That was frustrating for me when I was in the midst of collecting, but while itemizing all my books, I realized that those editions are the originals, which gives me a peek into what mystery books looked and felt like during their original publication.

The last eight books of the series are limited-print; that is to say, there aren’t many of those books in circulation. You can’t get them at Indigo, that’s for sure. So my parents had to go on an exhaustive treasure hunt to find those books for me since I was too young to do that myself. And unlike other kids my age who wanted a new bicycle or a Polaroid camera, all I wanted was to own the last eight books of *Nancy Drew* and complete my collection.

I only read most of the books once; even the last eight have only been opened once by me. But it’s having the books that makes me happy: they represented so much to me when I was a child. Nancy was a role model for me growing up: she never gave up, always tried to help others, and didn’t let her gender get in the way of her adventures. So now, I get to have an entire bookshelf dedicated to the

emblematic yellow covers that commemorate my childhood passion.

I'm incredibly proud to own the last eight limited-print books, but I most value that first volume my mom gifted me. It has three different stories within it: *The Secret of the Old Clock*, *The Bungalow Mystery*, and *The Mystery of the 99 Steps*. And while I have all three of those books in individual copies, it's the original volume that matters, since it's a physical copy of what started my passion for this collection, and it's the one book I will always keep no matter what.

Thanks to my attachment to *Nancy Drew*, I developed a deep love for literature, and not just mystery books. Now as a university student, I read all sorts of fiction, and I'm even pursuing a degree in Book and Media Studies to analyze how a series such as *Nancy Drew* can influence individuals, and by extension, society. Because of all people, I know how one childhood series can determine your path.
